

The aim of this 3 day course is to introduce the student to operationally proven drills and procedures that pertain to the use of mechanical, ballistic, thermal, hydraulic and cutting means in order to effectively breach doors, windows and soft wall targets.

On the successful completion of this course, the student will possess the necessary skills to accurately perform a target analysis and select the most suitable tool to gain access into the stronghold.

**COURSE CONTENT INCLUDES:**

**NOTE: This course will be conducted on an offsite commercial structure where live targets will be breached.**

- History and theory of non-explosive methods of entry
- Mechanical breaching of pull and push doors
- Mechanical breaching of windows
- Defeating barricaded doors
- Negotiating and defeating fences and obstacles
- Ballistic breaching
- Thermal breaching (BROCO and SPO torches)
- Quickie saw and chainsaw breaching
- Hydraulic Breaching (SAN Tactical Breaching System)
- All tactics to include approach, negotiating obstacles, and actions at the breach point
- Scenario based training

**Mechanical, Thermal,  
Power Tool, Hydraulic  
& Ballistic Breaching  
Course**
